Action Felin Token

Knowing that there are many animal rescue associations in need, we decided to make it our fight and find funds to support them in their rescues. We decided to follow the example of cryptocurrencies also created for animal rescue (babydoge). Therefore, we have created the FELIN Token (FLNT) in order to help financially or materially or an association for the protection and rescue of felines and their animal friends. The FELIN Token is also passive income (3% reflection in BNB), by simply keeping your Tokens in your Wallet.
